The hospital has a well-equipped blood bank and Diagnostic facilities. Hospital Diagnostic facilities like Laboratory and Radiology department are equipped with state of the art equipment. Hameed Latif Hospital is a standard barrier for

the provision of quality healthcare for the patient where more than 1000 doctors, Nurses, Paramedical staff and support staff work to ensure patient care. The Hospital is supported by excellent pharmacy and ambulance services which are available for all patients 24/7.

State of the Art
Hospital, backed by
Ultra-modern medical
equipment, World
Class Consultants,
Nurses, Paramedical
and Support Staff.

Vision

To spearhead the development of healthcare in Pakistan and facilitate the communities we serve to enjoy better and healthier lives.

Mission

To work hard with devotion and dedication to achieve our vision.

Our Values

Care

A healing touch, a warm smile, a kind word, all characterize the proverbial polite bedside manners of our doctors, nurses and auxiliary staff, as we go about ensuring the complete safety, confidence and comfort of all our patients.

Concern

Understanding the patient's point of view concerns us the most as we ensure the best quality health care including access to top class facilities, precise diagnosis and specialist treatment that will ensure a speedy recovery.

Compassion

Empathy, honesty and openness are reflected in every interaction with all those who come under our care and extends to patient's families and fellow colleagues.

Chairman's Message

Hameed Latif Hospital was founded in 1992 as a small 20 bed hospital to provide maternity services mainly to the middle class. Since then, thanks to the endeavors of the management and support of consultants, it has grown into a major 350 bed facility catering for all specialties – a creditable ten fold growth achieved in a span of 25 years. Healthcare is primarily the responsibility of the state. Government is required to provide free healthcare to the populace, irrespective of social status. Unfortunately, because of the paucity of funds, this has not been possible. At present government has allocated and is spending sizable sums of money on developing major teaching hospital, but the demand far outstrips the provision. This has opened the way for the private sector to step in and set up hospital facilities at all levels – tertiary, secondary and primary. These private sector initiatives to provide the needy with necessary medical services and facilities are to be lauded.

Hameed Latif Hospital enjoys a unique status, it is located in the city center for easy accessibility and provides services in all major specialties, namely Maternity, Gynae, Paeds, General Surgery and Internal Medicine. With fully equipped ICU and CCU facilities it provides excellent care to emergency patients. Other valuable services include Cardiology, Cardiac Surgery, Neurology, Neuro Surgery, Medical Oncology, Orthopedic, plastic surgery and intensive neonatal care.

With continued support of the Board of Management, I am sure, the hospital will continue to expand and in the near future create other specialties to provide healthcare in areas which are generally lacking in the country i.e. Liver Transplant and kidney transplant Surgery.

It gives me great pleasure to extend my good wishes to the management in all future endeavors and my sincere appreciation to the Chief Executive, Managing & Clinical Directors for raising the standard of care to the accepted international level, thereby becoming the first hospital to win approval of the Health Foundation of Punjab. This is indeed a singular distinction. My sincere thanks also go to all workers of the hospital for their dedicated services.

Prof. Dr. Rashid Latif Khan

CEO's Message

As Chief Executive Officer of Hameed Latif Hospital, it is my pleasure to welcome you on behalf of the 325 dedicated physicians and more than 1,000 healthcare professionals who work together to provide essential health care services to help you achieve optimum long-term health. Health Care is very serious business especially when it comes to running a large tertiary care hospital where million patients are served every year involving intricate diagnostic procedures and complex surgeries. As a tertiary care hospital, we feel a deep sense of pride and commitment to all those who place their trust in our care. Our primary focus is to deliver exceptional care that exceeds international standards in quality, safety and patient satisfaction.

LIFE Center (Lahore Institute of Fertility & Embryology)

Catering the needs of National & International Patients

LIFE was established in 1984 by Dr. Rahid Latif, a mere six years after the birth of Louise Brown; the first test tube baby of the world. We take pride in having delivered the first test tube baby of Pakistan. LIFE is an ever-renewing fertility centre, constantly introducing new state of the art technology, adjusting rapidly to changes and challenges in the field while consistently enduring high success rates. Our patients come first; recognizing and identifying their specific conditions and treating them accordingly while providing support every step of the way. We seek to deliver a better tomorrow as trusted partners to our patients, embodying the values of teamwork and integrity. We are the first ISO 9001:2000 Certified fertility center in Pakistan. We consistently deliver top IVF success rates, making us one of the leading centers. As a result of a collaborative team of fertility

specialists, counsellors, scientists, and nurses we have been able to develop a fully integrated Network that allows us to provide support at every step of your fertility journey. Our work captures the essence of our core values; high quality work, safety and integrity. Moreover, our investment in research reflects our strong commitment to enhancing patient outcomes. Here at LIFE, we are also one of the first to launch cryopreservation, pre-implantation genetic screening (PGS), and pre-implantation genetic diagnosis (PGD) programs in Pakistan. True to LIFE's guiding philosophy, we will continue to do our best, and continuously meeting and exceeding our patient's expectations and looking forward to hear more fertility success stories.

- **Pediatric Urology**
- **Pediatric Neurology & EET**

“High-tech pediatric department hosting abundant and unparalleled resources for pediatric care.”

Minimally Invasive Gynae. Unit (MIGSU)

MIGSU (Minimally Invasive Gynecological Surgery Unit) situated in Hameed Latif Hospital, Lahore-Pakistan. It's the first of its kind unit, exclusively for minimal invasive Gynecological surgeries. The facility has dedicated state-of-the-art Operation Theater, custom designed for Endoscopic surgery with the latest equipment. The first diagnostic Laparoscopy was done in 1974 in Pakistan by Prof. Rashid Latif Khan, since then he has been a pioneer of teaching and promoting laparoscopy. MIGSU was his brain child and was formed in 2009, under the leadership of Prof. Rashid Latif Khan. The team has evolved since then with all the Master Trainers being trained locally and internationally. Since then, we have taken care of nearly three thousand patients.

24/7 Emergency Services Department

Hameed Latif Hospital provides 24/7 emergency services to patients with different medical conditions ranging from intricate problems such as accidents, heart attacks and strokes to simple conditions such as cuts, broken bones and many other medical conditions. Our Emergency department is equipped with modern medical equipment as per integrated emergency service standards and providing best services to patients.

Chest Pain Unit

Adult ER Unit

Pediatric ER Unit

Minor OT

24/7 Critical Care Services Department (MICU, Paeds ICU, Neuro & Cardiac ICU, Surgical ICU, CCU)

On the 5th floor is the 20 bed, multi-disciplinary intensive care unit (ICU), perhaps the finest facility of its type in the provincial capital. It is managed by a senior registrar with a team of specialists and nurses especially trained to look after patients requiring acute care, round the clock.

At Hameed Latif MICU, the nursing ratio of 1:2, i.e. one nurse for every two patients is on a par with the world standard for critical care units. And being multidisciplinary the Unit is equipped to handle patients from various specialties in which consultants work closely with residents to ensure best possible care for the patient.

Every one of the 20 beds is fitted exclusively with a bedside cardiac monitor, central oxygen supply, IV lines and pumps and other specialized, highly advanced electronic monitoring equipment. The ICU is designed and equipped to handle both

non-invasive and intensive respiratory support for patients needing it, including new advanced ventilators and arterial blood gas machine for better assessment of patients on ventilator support.

A special area has been built in to the design to facilitate emergency surgical intervention and resuscitation of trauma patients.

CCU

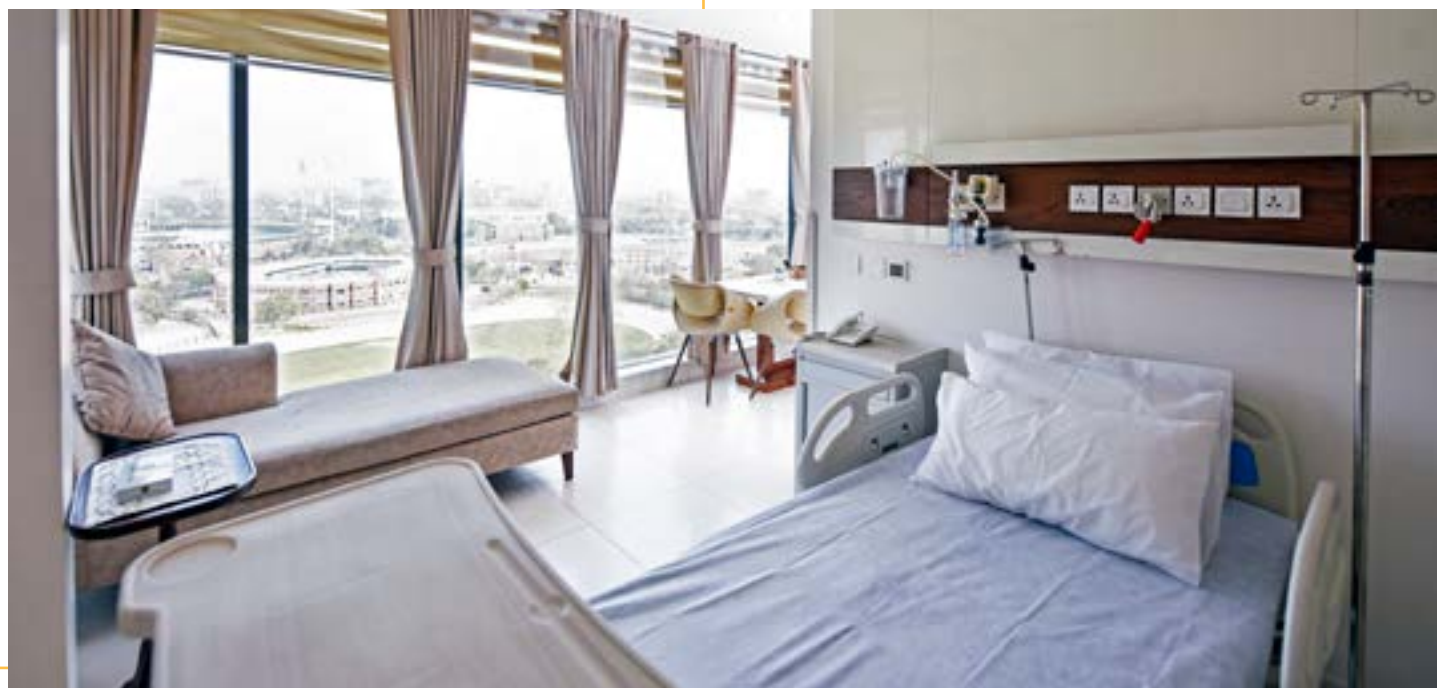

Executive Checkup Clinic / Corporate Clients Services

Our care providers understand your busy schedule and other commitments which are keeping you away from finding time for your health examination. The Executive Health Clinic at Hameed Latif Hospital is the right place for comprehensive medical care at an accelerated rate so that such patients may find it easy to attend their health.

We promise on time checkups, high end intensive care and state-of-the-art treatment for those taking time out of their running routine. Our dedicated team of specialists keep abreast of latest technology and has designed Executive Health Packages to meet the requirements of both privileged and under privileged.

Multiple Other Services Under One Roof Anesthesiology & Pain Management

The department of Anaesthesia comprises of a group of Consultant Anesthesiologists of Lahore. The group was formed by late Professor Sajid Usman Kaul in 1994 with the ambition of providing high standard and quality of anaesthesia. The group is now named as "KAUL ASSOCIATES" after the demise of Prof Kaul. Presently the department is providing total care to patients that includes pre-operative assessment, intra-operative care and post-operative care. Serious patients are managed by the department in Surgical Intensive care unit. Epidural services for labour pains are provided round the clock.

PAIN CENTER: It is a part of anaesthesia department. Patients suffering from chronic painful conditions like headache, backache, and cancer pain are provided pain relief services by well-trained pain consultants. The department is recognised by College of Physicians &

Surgeons Pakistan for FCPS Anaesthesiology training. So far more than fifty doctors have done FCPS and are working as consultants in Pakistan and abroad. The standard of training in anaesthesiology is considered as one of the best in Pakistan.

Nephrology and Dialysis

The Nephrology Department at Hameed Latif Hospital is run by highly trained specialists who possess the expertise and advanced skills to treat all diseases related to the kidney. Our expert team of nephrologists and state-of-the-art diagnostic and medical equipment, enables us to provide treatment for simple and complex Nephrological Conditions. The hospital has a 8 bedded well equipped dialysis center. All ICU beds have the facility to dialysis patients while being treated in the ICU (bed side dialysis).

The Department of Nephrology at Hameed Latif Hospital provide a complete range of consultative, diagnostic and treatment services for patients with kidney diseases. The scope of care encompasses all stages of kidney disease, from earliest detectable changes in kidney Function through End Stage Renal Disease. The division's goal is to provide

the highest quality care while helping patients manage their condition. Kidney failure is often associated with other medical issues, such as heart, lung liver diseases, cancer etc and other surgical or obstetrical disorders.

Urology and Lithotripsy

Hameed Latif Hospital has on its roster some of the best urologists in the country offering comprehensive urology services to diagnose and treat diseases of the urinary tract. These include: Urologic Cancers, Renal Transplantation, male infertility, kidney and urinary bladder stone removal and in Female Urology the diagnosis and treatment of urinary tract disorders prevalent in females. The Urology department also offers treatment for kidney stones without surgery through its ultrasound laser machine called Lithotripsy. The

department is also ready and inspected for future kidney transplants.

Pulmonology

Pulmonology is particular branch of medical science specified for the diagnosis and treatment of lungs and respiratory tract. Hameed Latif hospital is having pulmonologists specially trained in illnesses and disorders of the chest, predominantly pneumonia, asthma, tuberculosis, emphysema, and complicated chest infections. The department is equipped with state of the art ventilators, monitors and special machines (pulmonoveista) which helps Pulmonologists to manage critical patients on ventilators. This machine is only available at Hameed Latif Hospital

in Pakistan. Our Pulmonologists, Respiratory therapists, Nurses, Physiotherapists, Clinical Pharmacologists and Nutritionists work as a team to ensure quality treatment to patients.

Our interdisciplinary arthritis and rheumatology specialists and support staff are highly qualified to provide specialized care for patients with: Autoimmune diseases Gout Osteoarthritis Chronic Fatigue Syndrome Rheumatoid

arthritis Joint Pain Myositis Musculoskeletal problems

Lactational Management

At Hameed Latif Hospital, our lactation consultants are highly trained in imparting beneficial knowledge on the best ways to feed newly born infants. This can help enhance the women's breast feeding experience and at the same time help build a strong 'mother-child bond'. If you are planning to give birth soon, it is advisable to seek the services of our lactation experts, as part of your maternity package, so that you are given tips on breastfeeding before leaving for home with your newborn. Our lactation experts go beyond theory to practically demonstrate breastfeeding techniques

to new mums. They can help new mothers overcome such problems as low milk production, painful breasts, inverted nipples problems that only a lactation expert can solve.

Fetal Medicine (Strength of Hameed Latif Hospital)

Hameed Latif Hospital is renowned for its advanced obstetrical services to pregnant patients, particularly those facing serious reproductive challenges. These include those women who are pregnant or contemplating pregnancy but have medical conditions or are prone to certain risk factors. The Fetal Medicine Unit (FMU) at Hameed Latif Hospital is led by a team of highly skilled specialist doctors that offer diagnosis and treatment of complications which may arise in unborn babies. Our obstetricians are assisted by highly

trained midwives and support staff to deliver excellent results even in most complicated cases. Our aim is to provide the highest standard of care in a professional, calm and supportive environment.

Dental Surgery

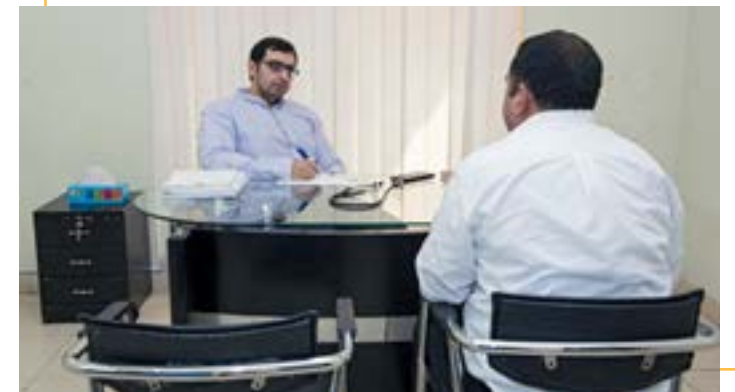

A genuine smile of appreciation reflecting a patient's gratitude and happiness is invariably the result of the skill of our surgeons and professional staff in the Department of Dentistry. They will do all it takes to improve your dental health and appearance through advanced techniques and specialized care. Our well equipped, well staffed dental clinics and surgeries offer professional treatment for: Veneers, Teeth Whitening, Dentures, Dental Crowns, Dental Bridges, Dental Implants, TMJ – Management of temporomandibular joint,

Extraction of Impacted Teeth / Wisdom Tooth Extraction, Reconstructive Oral Surgery

Psychiatry

Psychiatry is distinct field of medical science which deals with diagnosis, treatment and prevention of mental, emotional and behavioral illnesses. In the current era mental and emotional disorders seems to be very common and folks of every age and gender are suffering from it either. Hameed Latif Hospital has recognized ultra-modern psychiatry department possessing immensely experienced psychiatrists and psychologist for the satisfactory cure of their esteemed patients. Hameed Latif Hospital is benchmark for treating the following disorders in its psychiatry department:

Anxiety disorders Mood disorders Schizophrenia and psychotic disorders Dementia Eating disorders

Sleep Lab

Sleep Diagnostic Lab/CPAP Center is the first of its kind in Lahore providing complete effective solutions to treat Sleep Apnea and other sleep disorders. We are dedicated to serving the community with the highest standards of service and care. Our sleep consultants are fully trained to comply with best practices in delivering Sleep disorders diagnostics and treatments.

All of our studies are evaluated and reviewed by an American trained pulmonary and sleep physicians. Most importantly,

we provide personalized care, ensuring every patient receives both choice and ongoing support at an affordable price

Nutrition / Dietitian

Nutrition Center offers expertise and services related to dietary and nutritional lifestyle changes to prevent or reduce health risks and to manage serious health conditions and diseases. Our nutritional and dietary expertise is focused on improving the quality of your life, whatever your health status. Patients treatment and management is depended on a optimal nutritional status of the patient. At Hameed Latif Hospital all admitted patients are evaluated for their nutritional requirements by the expert and qualified nutritionists. All admitted cases are provided food as per their requirements for their speedy recovery on the advice of hospital nutritionists.

The nutritional consultants also provide treatment for weight reduction, for better diabetic sugar control and special diets for old patients, patients suffering for renal failure and parenteral nutrition.

Interventional Radiology

Interventional radiology department at Hameed Latif Hospital uses state of the art Angiography machines for advanced interventional radiology treatment of brain, heart, fibroids of uterus and peripheral disease of extremities. Imaging technology such as CT scans and Ultrasounds are used to help guide biopsy medical procedures. This technology eliminates the need for surgery and helps to diagnose and treat certain conditions. Patients are often awake during the procedure or under very mild sedation.

Interventional radiology includes treatment of:

- **Cancers**
- **Blockages in arteries or vein**
- **Fibroids of Uterus**

The Department of Diagnostic Radiology is one of the best in Punjab with advanced and modern imaging equipment providing the fullest range of radiological and ultrasound diagnostic services. The department performs thousands of radiological and ultrasound procedures every year. The department is run by highly qualified radiologists and technical staff. The department is recognized by PNRA of Pakistan. The department adheres to all patient and staff safety standards. The reports initiated by the department are reliable and timely. The department provides 24 hour services to all emergency and clinical departments. The radiological and ultrasound services being offered are as under:

- CT Scan
- Fluoroscopy
- Mammography
- Digital X-Ray
- 3D and 4D Ultrasound Imaging
- Echocardiogram

Blood Bank

At Hameed Latif hospital we have 24 hrs availability of blood and its products at the Blood Bank ensures efficient patient care.

HLH Laboratory (ISO Certified)

Hameed Latif Laboratories is providing quality diagnostic services to all clinical departments. The reliable, timely and accurate results are the foundation for the clinical doctors to make accurate diagnosis and prompt patient care. The laboratories are equipped with the state of the art equipment. The laboratory is providing services in Hematology, Histopathology, Chemical Pathology, Micro Biology, Immunology and PCR, and other advanced diagnostic tests. The Pathologists working in Hameed Latif Laboratory are fully qualified and experienced. The laboratory is certified by Punjab Health Care Commission and ISO certification. It is externally audited by RODAX, which is an international quality control agency. The laboratory also provides home care services in which patient samples are collected from their homes and the results are provided online.

Laboratory Departments

- Haematopathology
- Bio Chemistry
- Special Chemistry
- Histopathology
- Microbiology
- Molecular Biology

Specialized Test

- Anti Mullerian Hormone
- Hb-Electrophoresis
- Bone Marrow Biopsy
- Bact-Alert Blood Culture system
- Vitek-2 Antibiotic Sensitivity testing

Why Hameed Latif Hospital Laboratories?

- Free Home Sample Collection
- Dedicated 24/7 Lab Services
- Online Reporting / SMS alerts
- Fast and Accurate Results
- Competitive Rates
- Leading Laboratory of Pakistan
- ISO 2001-2015 Certified
- Licenced by Punjab Healthcare Commission
- Fully Automated Lab
- Professional Lab Faculty

Marketing & Business Development Department

Today, the healthcare marketing has become an inevitable reality both; for commercial and non commercial hospitals. Healthcare marketing perceptions and perspectives are fast changing with the changing needs and behaviors of patients and consultants. Responding to changing market needs, Hameed Latif Hospital has established a comprehensive "Marketing /Business Development Department" to achieve desired organizational goals and objectives. Marketing & Business Development Department operates under the guidance of "Healthcare Marketing Consultant" with a proactive managerial team. Segmented marketing approach is adopted to excel in key areas of marketing for early results.

Multi-pronged marketing strategies, corporate business projects, planned promotional and publicity activities developed to achieve marketing goals. As a responsible organization, Hameed Latif Hospital under the umbrella of "Corporate Social Responsibility" offering highly subsidized rates to patients admitted in dedicated Qamar Zaman male, female and children wards. Under CSR initiatives, hospital is regularly organizing "Free Medical Camps", "Free Sunday Clinics", CMEs Training Workshops at hospital for the benefit of general public. Hameed Latif Hospital also takes pride in introducing Corporate Social Responsibility concept in private healthcare organizations.

Ms. Yasmeen Zaki
Healthcare Marketing Consultant

As a responsible organization, Hameed Latif Hospital under the umbrella of Corporate Social Responsibility offering subsidies rates to the patients admitted in male, female and pediatric Wards on operating charges, Consultant Charges, Laboratory charges, X-Ray & Ultrasound

charges (for the patients in wards only) as Corporation Social Responsibility. Hameed Latif Hospital is pioneer in bring Corporation Social Responsibility concept in the healthcare industry for the well being of the society.

Recent Clinical Success Stories

Obstetrics & Gynecology Department

An unbooked patient, 34 years old, arrived in labour room on 13th February 2019 at 02:30pm from a city 2 hour away from Lahore with ruptured water bag since 07:00am at 35 weeks, she was admitted in Hameed Latif Hospital under care of Dr. Arooba Rahim and seen by Dr. Mariam Iqbal (Rashid Latif Group Team). She had previous H/O untreated Rheumatic heart disease (Severe mitral stenosis). She had conceived for the first time after 10 years of marriage. On arrival she had pulse of 122 beats per minute. With blood pressure of 100/60 mmHg. On examination patient was breathless & pale with Hemoglobin of 7.6g/dl & was fully dilated. Cardiologist Dr. Junain Zafar saw patient within twenty

minutes of arrival & advised treatment. Patient delivered baby by normal vaginal delivery at 03:30pm & had a 1.5 kg baby who was received senior pediatrician. Post-delivery patient remained well & was given treatment according to guidance of in house cardiologist. Patient & baby went home in good condition next day & advised Cardiac Surgery after 6 weeks of delivery.

Cardiac Department

Hameed Latif Hospital conducted laser Atherectomy / Ablation, of peripheral arteries, first time in Pakistan for very difficult and diffuse disease in diabetic patients. Dr. Athar Ansari and his team from California bring their equipment & treated three patients in Hameed Latif Hospital Cath Lab along with Dr. Masood Ahmad, Interventional Cardiologist from Hameed Latif Hospital. Hameed Latif Hospital Cath Lab

is state of the art facility with all the equipment for Coronary & peripheral Interventions. After the procedure the patient was shifted to CCU and discharged in stable condition.

General & Bariatric Surgery Department

The most obese child in the world who weights almost 200 KG at just ten years of age had a successful weight loss surgery by Dr. Maaz-ul-Hassan at Hameed Latif Hospital Lahore. Mohammed Abrar, struggles to stand after regularly eating meals meant to feed four adults. Despite weighing just 8lb at birth, he began gaining weight rapidly - tipping the scales at 42 pounds when he was just six months old. According to Dr. Maaz-ul-Hassan he is the most obese boy in the world, weighing even more than Indonesian Arya Permana, who hit the headlines for weighing 406 Pounds aged ten, three years ago.

According to his parents, who have two other healthy children, said Mohammed was perpetually hungry as an infant and would drink five times as much milk as his elder siblings. To save abrar's life Dr. Maaz-ul-Hassan, Bariatric Surgeon

of Hameed Latif Hospital Lahore performed Laparoscopic Sleeve Gastrectomy and the boy was discharged in a stable condition.

Neuro Surgery Department

Hameed Latif Hospital achieved another milestone in providing Neurosurgical care to patients suffering from disabling neurological diseases. Recently, a successful Deep Brain Stimulation surgery for Parkinsons disease was performed first time at Hameed Latif Hospital by USA trained world renowned Neurosurgeon, Prof Dr. Asif Bashir (MD, FACS) & his team.

The surgery resulted in immediate relief from crippling Parkinsons symptoms & patient was discharged next day, to start a new independent life.

Facilities are now available in Pakistan & Prof Asif Bashir is internationally known for his expertise in minimally invasive Spine surgery & DBS Neurosurgery. Indeed, it will be huge relief.

Neurology & Stroke Management Department

Hameed Latif Hospital is successfully providing Neurological care to patients suffering from different neurological problems. Recently, a patient namely Nikab Khan resident of Dir, KPK who had developed post traumatic carotid cavernous fistula on both sides of the brain. Prior to Hameed Latif Hospital, he had undergone two unsuccessful procedures at another facility/ hospital. He was referred to Prof. Dr. Qasim Bashir, consultant Clinical & Interventional Neurology at Hameed Latif Hospital Lahore. Dr. Qasim

Bashir devised an innovative treatment and placed two flow diverter stents simultaneously on both sides of the brain. Following which the patient gradually regained his lost vision. Bilateral Fistula's are rarely seen globally and such a treatment approach hence very unique

Pediatric Department

Hameed Latif Hospital saved life of a baby who was only 900 grams at the time of birth with very critical condition and discharged at 1.18 kg with stable condition.

Baby of Javeria Khurram, born at 27th Weeks Gestation Male Weighing 900 grams at birth , through Emergency LSCS due to PROM and meconium stained liquor. Baby needed resuscitation at birth and was intubated And shifted to NICU and connected to Mechanical ventilator. He was given surfactant initially, remained on ventilator for prolonged period due to poor respiratory effort & multiple apneas. He also developed pneumothorax during his stay in NICU for which chest tube intubation was done. Baby also developed grade 3 intra ventricular hemorrhage, and sepsis. Due to prolonged ventilation, he developed broncho-pulmonary

dysplasia / O2 dependency and retinopathy of Prematurity. At 44 days of life baby was extubated and shifted to CPAP. After a hard struggle of 55 days, he was successfully discharged on oxygen therapy with weight of 1.18kg.. Baby was given inj. Lucantis for treatment of retinopathy by Dr Fawad (ophthalmologist) after which his eyes examination remained / became normal The baby remained on regular follow-up, became O2 free at 3 months of age and gained weight of 2.2kg Alhamdulillah.
